

Activate 19

Non Lit – Single Sided 3D

Description

Procura Activate 19 turns the Slim 19 into a three-dimensional structure. The Activate post is a vertical corner component that the Slim 19 profile connects into seamlessly, allowing L, U and O configurations for partitions, display walls and wrapped corners. Graphics apply to both the inside and outside faces, and the corner joint is close to invisible. Supplied pre-drilled for direct wall fixing. Modular, so one frame can be resized and reused. Stabilizers are added above 2200mm.
