

Activate 80

Non Lit – Double Sided 3D

Description

Procura Activate 80 turns the Double 80 into a three-dimensional structure. The Activate post is a vertical corner component that the Double 80 profile connects into seamlessly, allowing L, U and O configurations for partitions, exhibition stands and freestanding rooms. Graphics apply to both the inside and outside faces, and the corner joint is close to invisible. Modular, so one frame can be resized and reused across events. Stabilizers are added above 2200mm.
