

UV Fabric

Care Sheet

Do **not** use cool iron or steamer.

Do **not** bleach fabric.

Do **not** machine wash.

Do **not** tumble dry.

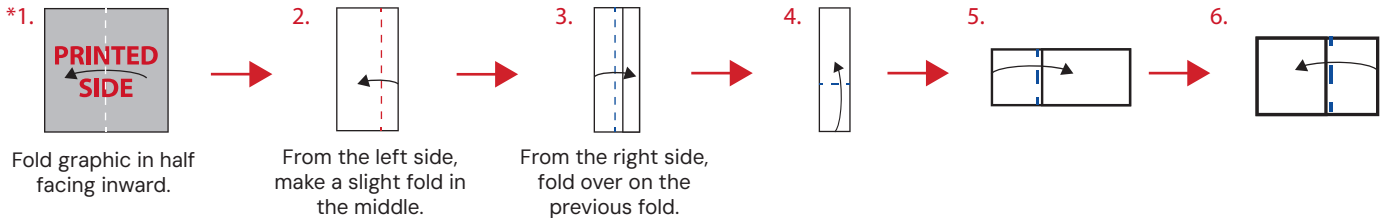

Handling Tips

1. If the fabric has wrinkles, lay it flat for a few hours.
2. Do not store fabric when it is damp or wet. Store it in a cool, dry area.
3. Fold the graphic with the printed side inward to minimize crease marks.
4. For storing graphics, remove the fabric from its plastic packaging and keep it in a cool, dry place.

Stain Treatment

1. Your UV fabric graphic can be gently cleaned with soap and water. Remove any hardware attached to the fabric before cleaning. Use mild air to dry the fabric and dry it on the frame if available.
2. Fabric must be completely dry before storing.
3. Do not dry clean.
4. Remove as much debris as possible with a soft bristle brush (do not rub too hard).
5. Use a clean, lint-free white cloth. Lightly pat the stain from the outside moving in to prevent spreading.
6. If a cleaning solution is used, rinse the area well with water to ensure no solution is left on the fabric.
7. Most stains can be treated with household fabric stain removers. Always test how the solution will react to the fabric by dabbing it on a small corner. Follow the treatment instructions provided by the cleaner based on the type of stain.

How to fold:

**Please note that some graphic sizes will fold differently.*
